

# Our new tanker wash out facility at Avonmouth is now open

The wash out facility consists of a high pressure cannon mounted on a moveable platform. All wash waters and solids are captured in a sump area and distributed within the Avonmouth site for further processing.

The main features of the tanker wash out service are:

- Wash outs are currently only available to vehicles which have tipped a load into the oil/water or effluent plants. To discuss any other wash out services please contact Site Management for details.
- Wash outs will be undertaken by trained Augean personnel in accordance with our Tanker Wash Out procedure which forms part of the certified Integrated Management System at the site.
- Enables the wash out to be carried out without the need for confined space entry.
- Vehicles will weigh before and after washing, disposal of solids being charged on a 'per tonne' basis.
- Wash out and disposal charges will appear as individual lines on your invoice.
- A tanker wash out certificate will be used to document the process.

To discuss your requirements in more detail and to book this facility please contact our dedicated team on:
