

PERFORMANCE REPORT

CS-PFR-14-2 Radiation Protection Supervisors

Work scope - Augean North Sea Services (ANSS) were contracted to deconstruct, dispose and decontaminate the internals of a NORM contaminated separator vessel. With the use of strict permitted access and fully NORM trained industrial tank cleaning specialists.

Solution - Using specifications given by the client, ANSS mobilised a team of qualified individuals, 2 x RPS supervisors and all the equipment necessary for the task. The resources sent were those of a very high standard and confidence fit to meet the needs required by the client.

RESULTS - ANSS on completion of the vessel met all requirements on the work scope provided by the client. Using their diverse teams built up of industrial tank cleaners, Radiation protection supervisors and Specialist waste personnel they completed on schedule with no lost time incidents.
