

Augean is one of the UK's market leaders in the treatment of Air Pollution Control Residues (APCr), Fly Ashes and hazardous Incinerator Bottom Ashes (IBA), servicing Energy from Waste and Biomass plants in England, Scotland, Wales and Northern Ireland.

Complementary and vertically integrated to these energy plant residue treatment services are Augean's Industrial Services activities which includes boiler cleaning and related works required during energy plant outages, both planned and unplanned.

Boiler Cleaning

Augean offers a wide range of Industrial Cleaning services specific to outages at EfW and Biomass plants. We deploy teams of experienced and skilled operatives with equipment to all areas of the UK, enabling us to undertake all tasks associated with boiler cleaning and associated areas.

- ✓ Enclosed solution for dry, high air flow vacuum suction removal of APCr and bottom ash deposits using filter bag hopper units to contain waste
- ✓ High Pressure Jetting services for cleaning of economizer banks, tube bundles and tanks
- ✓ Manual and air driven dry rodding services where water is not a suitable option

Our fleet of tankers can remove and transport washings to one of our own treatment sites in Scotland, Northern England, Southern England and Northern Ireland

We can remove bagged residues via our curtain sided vehicles

We can also provide Hipod containers for the safe storage of hazardous wastes including oily rags etc.

Augean is a market leader in APCr and Bottom Ash treatment and Safety is consistently at the forefront of how we operate our business

We may be able to offer a waste reduction option using a filter press if effluent treatment is available on site

We understand the sensitivities around time during outages and as such we engage fully with our clients in the weeks and months prior to any shutdown taking place in order to plan effectively and efficiently

All projects are completed in a safe and compliant manner with specific focus on hazards relating to confined space entry, HP Jetting and contact with hazardous substances

All of our experienced, multi-disciplined Industrial Service engineers, operatives and drivers have an outstanding reputation for participation in our clients' Safety Systems

We produce task-specific Method Statements, Risk and COSHH Assessments which are submitted for approval prior to commencement of the works

<p>INDUSTRIAL CLEANING</p> <p>Tank, silo, pit and industrial cleaning of all confined space areas Confined space support and rescue provision Advanced suction capability for long distances and heavy materials APCr filter hoppers with bagging plants</p>	<p>WATER JETTING</p> <p>Fully trained, certified and experienced operatives Drain jetting and interceptor maintenance Solids/sludge removal Towing and van-pack jetting equipment available</p>
<p>BOILER AND SILO CLEANING</p> <p>Boiler Shutdown Cleaning Ash Silo Cleaning and Blockage Removal Boiler Surface Preparation for Inspection Cleaning of Tube Bundles</p>	<p>SUPPORT SERVICES</p> <p>Deep cleaning of plant rooms, labs and other industrial applications Chemical decontamination and clean-up CNC machine cleaning and oil removal Large scale vacuumation projects requiring high level access techniques</p>
